Functional Ingredients for Foods & Beverages

GARCINIA CAMBOGIA EXTRACT

Standardized potassium salt of the active component, hydroxycitric acid (HCA)

Natural weight loss support/appetite suppressant

Garcinia cambogia is a small to medium sized tree native to Southeast Asia. The dried fruit rind of *G. cambogia* is commonly used, particularly in India, as a food preservative, flavoring agent, and carminative. Fruit from this plant is included in the United States Department of Agriculture's inventory of perennial edible fruits of the tropics. The active ingredient of the fruit responsible for flavoring and other properties has been identified as (-)-hydroxycitric acid (HCA). Citrin[®]K, an extract prepared from the dried fruit rind of *G. cambogia*, is a creamy white, non-fibrous powder without any distinct odor or taste.
