Functional Ingredients for Foods & Beverages

L-SELENOMETHIONINE

Source of essential trace mineral nutrient, selenium

Bio-available, pure and safe form of selenium

Selenium SeLECT is Sabinsa Corporation's branded L-(+)- Selenomethionine compound, the most bioavailable, pure and safe form of selenium. Selenium is a trace mineral that is found naturally in soil. Dietary sources of selenium include unrefined grains such as wheat, fish and nuts. Selenium is unevenly distributed in the earth's crust, therefore, different populations are at risk for selenium deficiency. Selenium supplementation can ensure that individuals are receiving at least the minimum recommended daily allowance.
