

2018 FOR NUTRITION, INGREDIENTS, NUTRACEUTICALS, ORGANICS, SUPPLIERS AND FOOD SECTORS

2018 was a year of publications for the Sami-Sabinsa Group. Several new scientific publications have come out from clinical studies conducted previously. Just on our curcumin brand alone, Curcumin C3 Complex, we have surpassed 100 publications that cite directly

this branded ingredient. Additionally, thirteen Sami-Sabinsa Group staff members involved in implementing the 21 CFR part 117 regulations at all of the company's manufacturing facilities in India have been trained and certified by the Food Safety Preventive Control Alliance

(FSPCA) as Preventive Control Qualified Individuals (PCQI). There has been a trained PCQI officer in the Utah, USA plant to comply with the Food Safety Modernization Act (FSMA) since July 2017. Our USA division appointed the first ever woman CEO, Asha Ramesh, she's been with the company for 24 years. The Group's founder, Dr Muhammed Majeed and Sabinsa's parent company Sami Labs were honoured recently with several awards by the Associated Chambers of Commerce & Industry of India (ASSOCHAM). Dr Majeed received a Shield of Honour from India's Minister for Health & Family Welfare and Sami Labs was honoured with two Certificate of Excellence Awards: Best Nutraceutical Company and Best Herbal Research Company. We just achieved our 200th patent as well, however we know that defending and protecting these patents is equally, if not, critically important to both us and the customers we serve. Associated Chambers of Commerce & Industry of India (ASSOCHAM) also honoured Sami Labs and Johara Cosmetics with Best Raw Material/Ingredient Supplier and Best Cosmetics Company.

- Dr Muhammed Majeed

Founder & Chairman, Sami-Sabinsa Group
